

RFS SERIES

The RFS Series is the premier semi-permanent structure in the Rekord product line. The RFS is an Engineered Structure that features our tensioned fabric membrane design technology to deliver a clear-span, relocatable structure. The concept offers Clients complete design flexibility in a cost-effective manner that can be applied to virtually any type of structural or building need. Rekord manufactures the RFS Structure Line with the highest-quality materials that deliver long-term proven durability and year-round functionality in even the most extreme climates. The modular design makes the build rate quicker than conventional construction, and it can be easily reconfigured and expanded to accommodate client's evolving needs. Also, the RFS requires little or no ground preparation, saving additional time and cost. The initial construction cost of our RFS Structure is highly competitive; additionally, they are engineered to lower overall project costs, reduce operating and energy expenses, and minimize ongoing maintenance costs. This level of versatility makes the Rekord RFS Series a highly cost-effective and viable structural solution.

While the customizable diversity of the RFS design offers limitless application opportunities, some typical uses are:

Industrial

- Agricultural
- Automotive
- Aviation
- Barracks/Dormitory
- Conference Halls
- Construction
- Corporate Events
- Dining Facilities
- Environmental
- Event Venues
- Exhibition Halls
- Glamping Compound
- Manufacturing Facilities
- Market Booths/Space
- Military Infrastructure/
/Support/Logistics
- Mining
- Oil and Gas
- Outdoor Concerts
- Transportation
- Warehousing/Storage

NON-Industrial

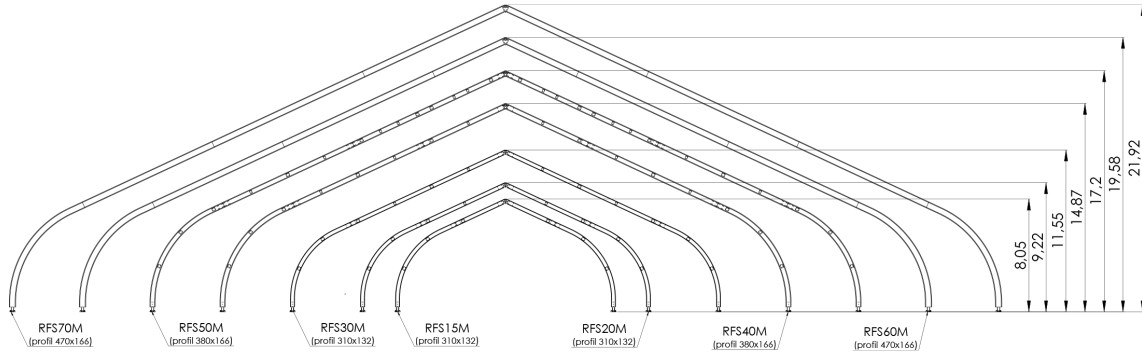

- Medical Facilities
- Church Buildings
- Correctional Facilities
- Disaster Recovery
- Emergency Response
- Education
- Gaming Facilities
- Homeless Shelter/
/Center
- Corporate/
/Commercial Facilities
- Sports and Recreation

Beyond the technical advantages of our engineered tensioned fabric structures, their beautiful interior space creates an abundance of light and roominess. Natural daylight, high ceilings, and unique finishes create depth and spaciousness. Translucent membrane coverings and floor-length windows add to the open and inviting characteristics of our ultra-functional fabric enclosures.

RENT SALE SERVICE

Rekord offers a full complement of accessory packages addressing any potential functional need. We carry the following accessory packages as standard offerings and can custom design packages to meet the client's unique needs.

- Internal Liners
- Electrical Packages
- Lighting Packages
- Interior Partition Walls
- Aviation Hangar Doors
- Insulation
- Heating
- Air Conditioning
- Communications
- Various Finishes
- Glass Doors and Windows

RFS Series Specifications:

Application:	Aircraft hangars, sports arenas (including ice-skating), event/party tents (including concert halls), warehouses
Span range:	from 15m to 70m (from 591" to 2756")
Length	to any extend, increased modularly every 5m (197")
Height (Ridge):	from 8,05m to 21,92m (from 317" to 863")
Available colors:	Unlimited Color Options
Insulation:	Based on order
Decoration:	Based on order
Snow load:	0,2 kN/m ² (unless otherwise specified in the order)
Resistance to wind gusts:	28 m/s [92ft/s] (unless otherwise specified in the project)
Doors:	Based on Order
Windows:	Based on Order
Gates:	Optional
A/C, Heaters, Ventilators, ECUs:	Optional
Ventilation ducts:	Based on Structural Dimensions
Flooring:	Optional
