

ER 5000 Logistics Trailer

This trailer is designed to accommodate up to 20 people. It is equipped with heating and air conditioning systems and provides billeting and living equipment.

A key advantage of the system is its immediate readiness for operation without the need to unload power and heating units. The trailer is compatible with high-mobility and increased-mobility vehicles. The trailer is compatible with high-mobility and increased-mobility vehicles.

The equipment can be customized according to the customer's requirements, while the standard configuration includes:

- 2 rapid deployable NSR tents
- 2 air conditioners
- power generator
- 20 beds
- portable toilet and shower cabin
- 2 transport crates

ER 5000 Logistics Trailer

Trailer technical specifications:

- Unladen weight of the trailer: 5,204 lbs
- Weight of the trailer with equipment: 11,155 lbs
- Number of axles: 1 with mechanical suspension
- Brake type: Drum
- Number of wheels: 2 + spare wheel
- Wheels: Equipped with tubeless tires of size 385/65 R22.5, including a full-size spare wheel mounted outside the cargo area in a manner preventing free movement (spare wheel lift).
- Service brake: Pneumatic, overpressure, dual-circuit with an automatic brake force regulator.
- Equipped with an anti-lock braking system (ABS).
- Parking brake: Diaphragm-spring actuator operating on the principle of pressure drop. Controlled by a hand valve from the driver's cab or a release valve at the trailer.
- The trailer is equipped with an automatic brake.
- Brake system: Fitted with connectors to link the trailer's brake system to the towing vehicle's brake system, operating in a dual-circuit brake system.
