

GTX INFLATABLE TENT

A GTX Inflatable rescue tent is a perfect solution for creating a confined space in short time. Dedicated to services and formations such as police forces, fire brigades or medical rescue units, GTX tents are ideal as a base facility during rescue operations.

- The tent can be inflated with a compressed air, electric compressor or a hand pump.
- The tent is manufactured from the highest quality materials, that are resistant to damage, including abrasion or punctures.
- Well-designed framework and an extensive anchoring kit ensure full stability of the tent.
- It can be used as a storage facility for equipment and other resources.

GTX INFLATABLE TENT
