

HAN SERIES

The HAN Series is built for the protection, repair and maintenance of military equipment. A relocatable aluminum frame ensures quick assembly and disassembly and the modular design can be extended to accommodate large equipment and vehicles. The HAN Series is suitable for extreme weather conditions, including arctic, desert, temperate and tropical climates.

- **Enhanced Durability:** Built with rigid aluminum frames, which are articulated to galvanized steel base plates. Steel wind braces ensure structural stability.
- **Modular Gable Walls:** Three sectioned clamshell door provides flexible opening access for large equipment or vehicles.
- **Customizable Solutions:** Our tensioned fabric membrane can be fitted with doors and openings to integrate heating and ventilation ducts.
