

NSR WS TENT

NSR WS is a rapid-deployment tent designed for special military forces, featuring a specialized vestibule that enhances functionality.

This tent was awarded the Commander of the Territorial Defense Forces Prize for light infantry equipment at the 2023 Kielce Defense Industry Expo.

- The vestibule design ensures that interior lighting remains concealed from outside view.
- The vestibule is typically with no floor, allowing for the installation of accessories such as a matted spill tray for footwear disinfection.
- The frame and membrane allow various connection configurations, including direct and lock connections, with options for parallel, serial, and serial-parallel setups.
- It can also be connected to containers for additional versatility.

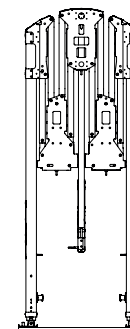

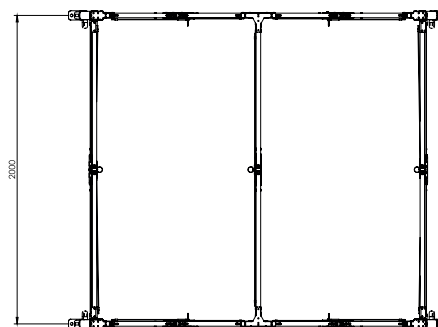

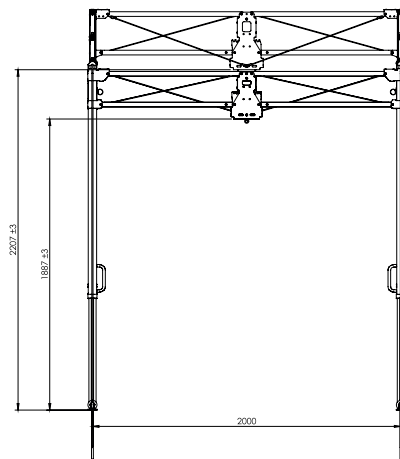

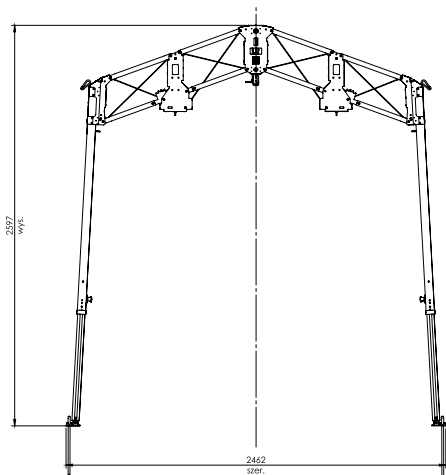

NSR WS TENT

Technical parameters of the vestibule:

Span:	2,46 m
Length:	2 m
Ridge height:	2,6 m
