

WC-14 TOILET CONTAINER

The WC-14 Toilet Container is our state-of-the-art restroom container, designed to offer the utmost in comfort and efficiency. Featuring 14 independent toilet stalls, each stall includes a washbasin.

The container is equipped with a high performance heating and ventilation system for user comfort, as well as a non-slip floor for added safety.

The container can be outfitted with power generators to ensure uninterrupted operation during a power outage.

- **Efficient Climate Control:** Equipped with a robust, high performance heating and ventilation system for optimal conditions.
- **Enhanced Safety:** A non-slip floor prioritizes safety and comfort.
- **Flexible Waste Management:** Can be connected to an external waste tank in locations without direct sewer access.
- **Reliable Power Supply:** Can be outfitted with power generators to ensure uninterrupted operation during power outages.
- We offer a waste removal and cleaning service for easy maintenance.
